

Amendment to the Specification:

Please replace paragraph [0035] with the following amended paragraph:

“[0035] Figure 4 illustrates an exemplary multi processor computer system architecture 400, according to one embodiment of the present invention. Multi-processor system 400 includes main processing module 410 that includes USB host controller 414 and main CPU system 412. Main CPU subsystem 412 can include Pentium,TM CeleronTM or similar [[a]] multi-function IA32 microprocessors. Main CPU subsystem 412 can use the WindowsTM operating system. Main processing module 410 is connected to sharing module 450 via USB link 430 according to one embodiment. Additionally, main processing module functions in high power state and main CPU/OS based low power state described above.”
